DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Daniel et al (USPN: 5,848,068).

- Consider claim 1, Daniel et al (hereafter Daniel) shows a system for merging a plurality of connections that could share a same class of service into a single virtual circuit connecting a first switching node to a second switching node in an ATM network (see figure 1, item 30). The prior art contains a data buffer (see figure 2, item 68) used for storing cells that constitute a packet received by a switching node. Daniel provides a queuing apparatus comprising of a plurality of connection queues associated with each of the connections (see figure 2, items 48 and 50). Daniel also provides a scheduled queue corresponding to a particular class of service (see figure 2, item 46; and figure 1, items 24, 22, 16, and 20 for examples of system utilized classes). The prior art contains a component that performs the tasks of the claimed Reassemble Queue Control Block and the Scheduled Queue Control block (see figure 14, item 210; and column 30, lines 62 – 65).

Allowable Subject Matter

3. Claims 2 – 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
